OBJECTIVE

Software Engineer with 7+ years of experience in Backend Php frameworks, seeking full-time backend roles.

EDUCATION

Bachelor of Software Engineering, University of Karachi   06/2018 - 02/2022

During my four years of software engineering, I gained a strong foundation in programming, algorithms, and data structures. I learned full-stack web development, database management, and software design principles. My coursework covered object-oriented programming, system architecture, and agile methodologies. Additionally, I developed problem-solving skills, collaborated on team projects, and explored emerging technologies.

SKILLS

Php	Laravel	Wp Plugin Development	Python
Django	Ajax	Github	JavaScript
Wp Theme Customization	jQuery	WordPress	MySql
BitBucket	GitLab	AWS S3	

EXPERIENCE

Sr. Developer   Oct 2025 - Present
Securiti.ai   *Karachi, Pk*

Developed a system for tracking user activity on the website and sending real-time alerts based on their actions. Additionally, I contributed to a product that boosts sales for the marketing team and developed a data analytics tool that monitors website traffic, providing detailed reports on user behavior for better understanding decision-making.

Sr. Software Engineer   June 2022 - Oct 2024
Codup   *Karachi, Pk*

At Codup, I specialized in building and maintaining Laravel-based web applications, utilizing Eloquent ORM for efficient database interactions and employing Git and Bitbucket for collaborative code versioning. My expertise encompasses API development with WP REST and enhancing performance by caching complex queries with Memcached. Additionally, I concentrate on WordPress plugin development, using core PHP to improve functionality. I have developed a WordPress plugin published on WordPress.org, actively addressing user-reported issues on the support forum and creating new extensions while introducing features to ensure compatibility with the latest stable versions of WordPress and PHP. data management and functionality.

Php Developer   Aug 2019 - May 2022
Salsoft Technologies   *Karachi, Pk*

At Salsoft I handled all backend-related tasks, including WordPress plugin development and WooCommerce product and order customization using WordPress hooks and filters. Additionally, I worked with MySQL queries for bulk customizations within projects to ensure efficient data management and functionality.
